SUBJECT: Formation of Landscape Maintenance District No. 55

RECOMMENDATION

That City Council adopt a resolution declaring Council’s intention to form and levy fiscal year 2006-2007 assessments in Landscape Maintenance District No. 55, consisting of Tract No. 5640 (Wingfield West), located at Dunkirk Drive between Northport Lane and Rivera Court, and setting a date for a public hearing thereon.

DISCUSSION

As a condition of development, the developer of Tract No. 5640 (Wingfield West), located at Dunkirk Drive between Northport Lane and Rivera Court, consented to the formation of a landscape maintenance district.

On September 20, 2005 Council adopted a resolution proposing formation of District No. 55 and ordered the City Engineer to prepare a report for the District. The report describes the landscape improvements to be maintained and calculates the proposed assessments within the District.

District No. 55 will be a contract service district. City staff will obtain bids from private contractors on behalf of the District. The proposed assessment is based on contract prices already in place in the City.

FINANCIAL IMPACT

If the District is formed, the City will be able to provide landscaping services in the District at no cost to the General Fund.

00042

SECTION 4 ASSESSMENT OF ESTIMATED COSTS OF MAINTENANCE

This assessment applies to the 2006-2007 fiscal year.

- a. The net amount, determined in accordance with Section 3, above, to be assessed upon assessable lands within the District is \$22,804.22.
- b. A description of each assessable lot or parcel for land within the District is contained in the diagram referred to in Section 2 hereof.
- c. The net amount stated in subdivision (a) of this Section 4 is apportioned among such lots or parcels in proportion to the estimated special benefits to be received by each lot or parcel from the maintenance of the landscaping improvements by the following formula or method: Dividing such net amount by the number of assessable lots or parcels within the District. Thus, the net amount of \$22,804.22 is divided by 41 parcels for an assessment of \$556.20 per lot or parcel.

The landscape maintenance described in Section 1 is for the visual enhancement, visual screening and preservation of open space for all parcels. The landscape maintenance along the streets of the District add value and enhance the aesthetic qualities of the District. Although all parcels do not front on the maintained areas, they are accessed via these areas, and therefore all properties within the District obtain special benefit from such areas. In addition, the landscaping elements discussed in this report were all conditions of the tract development plan.

The special benefits assessed to the parcels within the District are approximately equal for all parcels due to both increased property values and enhanced aesthetic qualities for all District property owners. Maintenance and operation of the landscape improvements of which the cost is included in the assessments does not confer any general benefits on real property located in the District or the public-at-large.

- d. The annual maintenance costs in future years will not require the preparation of an Engineer's Report. Maintenance costs and assessments are expected to increase in accordance with inflation and the consumer price index. Property owners will not be assessed higher annual maintenance assessments in excess of the Consumer Price Index (CPI) as published by the United States Department of Labor for all urban consumers (Los Angeles - Region) when compared to the October 2005 CPI, (206.9 - with 1982-84=100.0) without compliance with applicable procedures set out in Article XIID of the California Constitution. Annual adjustments for electric power and water service may be greater than the CPI but shall not exceed five (5) percent of the previous fiscal year budget for electric power and water service plus administration. Assessments that do not exceed the amount calculated in accordance with the assessment formula may be made without further mailed notice and balloting.

00043

e. In our capacity as Engineer, we hereby find and determine as follows:

1. The proportionate special benefit derived by each parcel proposed to be assessed has been determined in relationship to the entirety of the maintenance and operations expenses of the landscape improvements described in Section 1 of this report and depicted on the diagram for the District.
2. No assessment is proposed to be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.
3. Only special benefits will be assessed.
4. Maintenance and operation of the landscaping improvements of which the cost is included in the assessments does not confer any general benefits on real property in the District or to the public-at-large.
5. There are no parcels within the District that are owned or used by any local government, the State of California, or the United States Government.
